SUMMARY

Junior software engineer with hands-on experience delivering production features and backend systems in live environments. I enjoy solving operational problems through software, building APIs, automating workflows, and taking ownership from requirements through deployment. While my strongest experience is in ASP.NET and React, I'm comfortable learning new technologies quickly.

SKILLS

- **Web Development:** C#, ASP.NET, TypeScript, Node.js, React, EF Core, SQL, PostgreSQL.
- **Tools:** Git, GitHub Actions, Postman, Docker, Claude Code, Jira.
- **Spoken Languages:** Arabic (Native), English (Fluent).

EXPERIENCE

Software Engineering Intern

MAR 2026 - JUN 2026

Rena | London, UK

- Created and improved 5 production-ready features using React and ASP.NET.
- Collaborated with designers and engineers to shape new features and refine existing ones, translating business needs into user-friendly solutions that serve +350K users.
- Owned the testing and QA process for my deliverables, catching edge cases and fixing bugs using Postman and xUnit for backend and manual testing for frontend.

Software Engineering Intern

AUG 2024 - JAN 2025

Foothill Technology Solutions | Nablus, Palestine

- Developed and enhanced 3 REST APIs with ASP.NET Core and managed database migrations with EF Core, improving code reliability and boosting response times.
- Secured 95% of API endpoints using JWT authentication and role-based access control.
- Wrote +90 unit and integration tests that covered a wide range of edge cases using xUnit.
- Automated testing and deployment workflows using GitHub Actions and Docker.

PROJECTS

Aqwa

2026

Gym Management System | github.com/Janaherself/aqwa

- Inspired by operational challenges I faced at a local gym, I am building a management system that streamlines memberships, attendance, and staff workflows for more than 2000 members using ASP.NET, React, and PostgreSQL, with Claude assisting development.

Sorpresa

OCT 2025 - JAN 2026

Mystery Package E-Shop | github.com/Janaherself/sorpresa

- Implemented a full-stack e-commerce platform using Node.js, Angular, and PostgreSQL.
- Built a modular REST API, improving reusability and cutting code duplication by 20%.

EDUCATION

Nanodegree in Full Stack Development

JUL 2025 - JAN 2026

Palestine Launchpad with Google and Udacity | Remote

Bachelor of Science in Computer Science

2019 - 2023

Palestine Technical University - Kadoorie | Tulkarm
